Page 5, after line 9, please insert the following new paragraph:

Figs. 39B and 40B show a plurality of light sources 3 optically coupled to different portions of the width of the input edge of the panel surface areas 22 and the reflective or refractive light extracting surfaces 101' of different ones of the deformities 135 at different locations across the panel surface areas oriented at different angles to face different portions of the input edge to which the different light sources are optically coupled.
